

# SEA ANIMAL MOVEMENT

## 2022 OUTREACH PROGRAM

### LIVING SHORES<sup>™</sup>

#### AQUARIUM

The Sea Animal Movement program offered by Living Shores Aquarium coincides with the 2022 collaborative summer library program and strives to foster engagement, excitement and creativity around ocean life for children. Students are immersed in sea animal movement during this one hour program. A narrated reading will kick things off while kids are asked questions to stimulate their critical thinking skills. Next up, kids will get up and MOVE by mimicking a variety of ocean animals through demonstration and interactive game. Afterwards, children will get up close to a few residents of Living Shores. The program will culminate with a collaborative coloring activity in which kids will create a collage of ocean animals.

For further information and to book this program please fill out the group form at [livingshores.com/groups](https://livingshores.com/groups)
